Waste & Recycling Collection Map

Introduction

The new automated collection system uses a specialized vehicle to collect the new wheelie bins that are being distributed. For that reason, you cannot use your new bins until we start using the new vehicles to collect. Waste and recyclables will be collected at the same time with the same vehicle in a two compartment truck. In the urban areas, you will be collected weekly and on both sides of the road, where possible. In the rural area, you will be collected bi-weekly and on one side of the road as outlined below.
